SUMMARY

Cybersecurity enthusiast specializing in offensive security, ethical hacking, and Vulnerability Assessment and Penetration Testing (VAPT). Hands-on experience in web application and API security testing, vulnerability assessment, and security reporting, with knowledge of Python, networking, cloud security, and defensive security fundamentals. Passionate about identifying security weaknesses and strengthening application and infrastructure security.

TECHNICAL SKILLS

- Penetration Testing: Burp Suite, Nmap, FFUF, SQLmap, Nikto, XSStrike, OWASP ZAP, Vega, OpenVAS.
- Web & API Security: OWASP Top 10, OWASP WSTG, API security testing, authentication and authorization flaws, BOLA, SQL injection, XSS, CSRF, and access control testing.
- Programming & Scripting: Python, JavaScript, Bash, Flask.
- Networking: TCP/IP, OSI Model, DNS, HTTP/HTTPS, VPNs, proxies, and packet analysis.
- Cloud Security: AWS security configuration assessment, cloud misconfiguration identification, and foundational knowledge of Microsoft Azure.
- Defensive Security: SIEM, EDR/XDR, SOAR, threat intelligence, and network traffic analysis.
- Methodologies & Reporting: Reconnaissance, vulnerability assessment, vulnerability validation, risk assessment, and professional VAPT report writing.

PRACTICAL EXPERIENCE

- Web Security Labs: Practised OWASP Top 10 and advanced vulnerabilities using PortSwigger and OWASP Juice Shop.
- CTF Labs: Completed practical assessments on Mr. Robot, Jangow, and Zero Bank.
- API Security: Tested crAPI and developed and hardened a vulnerable Flask API.
- Cloud Security: Practised AWS and Azure misconfiguration assessment using CloudGoat and AzureGoat.
- VAPT Reporting: Documented vulnerabilities, risk ratings, and remediation recommendations.
